

AI-Powered Student Assistant Chatbot Using Python

Project Description

The "AI-Powered Student Assistant Chatbot" is a desktop-based chatbot application developed using Python and Tkinter GUI for the subject of Artificial Intelligence. The main purpose of this project is to demonstrate the practical implementation of AI concepts through an interactive and user-friendly chatbot system.

This chatbot is designed to communicate with users and respond to different types of queries such as greetings, Artificial Intelligence-related questions, date and time requests, and simple mathematical calculations. The chatbot uses rule-based AI logic and keyword matching techniques to analyze user input and generate appropriate responses efficiently.

The graphical user interface (GUI) of the project is developed using Tkinter, which provides a clean and professional desktop application environment. Additional features such as delete chat option, Enter key support, calculator functionality, and intelligent greeting detection improve the overall user experience. This project also demonstrates how Python can be used to create simple AI-based applications in a practical and understandable way.

AI Chatbot Prompts and Responses

Greetings Prompts

User Prompt	Chatbot Response
Hi	Hello! How can I help you?
Hello	Hello! How can I help you?
Hi There	Hi! I am here to assist you.
Good Morning	Hello! How can I help you?
Good Evening	Hello! How can I help you?
How are you	I am just a program, but I am working fine.

Artificial Intelligence Related Prompts

User Prompt	Chatbot Response
What is AI	AI stands for Artificial Intelligence.
Machine Learning	Machine Learning is a branch of AI where systems learn from data.
NLP	NLP helps computers understand human language.
What is Python	Python is a programming language used in AI and development.
What is Chatbot	A chatbot is a program that talks with users.

Date and Time Prompts

User Prompt	Chatbot Response
Time	Displays current system time
Date	Displays current system date

Calculator Prompts

User Prompt	Chatbot Response
5+3	Answer: 8
10+20	Answer: 30
15+5	Answer: 20

Exit Prompts

User Prompt	Chatbot Response
Bye	Goodbye! Have a nice day.
Exit	Goodbye! Have a nice day.
